

ISP2

SUBSEA PRESSURE POD

The ISP2 provides a highly cost-effective subsea housing for a variety of underwater applications.

Each connector end cap can accommodate multiple connectors, allowing connection to multiple subsea sensors or other underwater devices.

Sufficient room is provided inside for housing electronics or batteries at atmospheric pressure.

All Subsea Housings are pressure tested and provided with a Pressure Test Certificate.

FEATURES BENEFITS

Large Internal Area	Ideal for housing batteries, dataloggers and bespoke solutions.
Multiple Connectors	To connect to other subsea equipment.
Small Diameter	Ideal for mounting on an ROV, AUV or Subsea Tooling.
Lightweight	Perfect for applications where weight is critical.
2,000m Depth Rating	Capable of withstanding significant pressure.

Other custom housing designs and connector options are available.
Dimensions given in mm, standard configuration of the ISP1.

PHYSICAL

Depth Rating	2,000m
Body Material	Hard Coat Anodised Aluminium (7075-T6)
Endcap Material	Anodised Aluminium (7075-T6)
Endcap Locking Method	Stainless Steel Screws
Connector(s)	Endcap modified to suit connector requirements
Weight	Dependent on Configuration
