

JOB DESCRIPTION – PRODUCTION TECHNICIAN

Revision: 1.6 | 24th April 2024

Reporting Line

The Production Technician will report directly to the Operations Manager.

Location

Impact Subsea Ltd, Aberdeen Energy Park. There may be a requirement to visit suppliers, customers, conferences, exhibitions and other work locations.

Role

To primarily work on subsea sensor production and customer support.

Key Responsibilities

The Production Technician will be required to:-

- Ensure equipment is manufactured to meet delivery schedules: building & testing.
- Support the development team in product development decisions and product testing.
- Comply with management system procedures including health, safety and environmental requirements within the company.
- Convey a professional image of the company at all times.
- Carry out any other tasks within the competence of the role and jobholder.

Key Outcomes

- To ensure products are built to meet delivery schedule.
- To assist in the day-to-day business operations.

Limits of Authority

Full responsibility for all operational activities within the philosophies and constraints laid out in the job description.

The company reserves the right to change activities listed, taking into account the job holder's qualifications and experience to enable the business needs to be met.

Qualifications & Experience

Essential:

- Degree, HND or equivalent experience in an electronic or electrical engineering discipline.

Desirable:

- Relevant experience in assembly and testing of subsea electronic equipment.

Personal Attributes & Knowledge

Essential:

- A proactive approach to dealing with challenges.
- Experience in working directly with customers.
- Experience in working on production of equipment

Desirable:

- Flexibility to travel to meet the requirements of the role.
